

Underage Drinking in Rhode Island

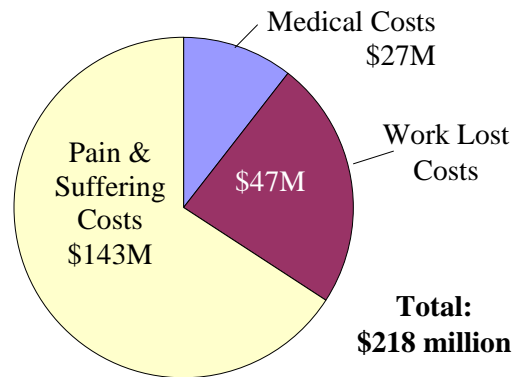

The Facts

Tragic health, social, and economic problems result from the use of alcohol by youth. Underage drinking is a causal factor in a host of serious problems, including homicide, suicide, traumatic injury, drowning, burns, violent and property crime, high risk sex, fetal alcohol syndrome, alcohol poisoning, and need for treatment for alcohol abuse and dependence.

Problems and Costs Associated with Underage Drinking in Rhode Island

Underage drinking cost the citizens of Rhode Island \$218 million in 2007. These costs include medical care, work loss, and pain and suffering associated with the multiple problems resulting from the use of alcohol by youth.¹ This translates to a cost of \$1,943 per year for each youth in the State. Rhode Island ranks 36th highest among the 50 states for the cost per youth of underage drinking. Excluding pain and suffering from these costs, the direct costs of underage drinking incurred through medical care and loss of work cost Rhode Island \$74 million each year.

**Costs of Underage Drinking
Rhode Island 2007**

Costs of Underage Drinking by Problem, Rhode Island 2007

Problem	Total Costs (in millions)
Youth Violence	\$122.1
Youth Traffic Crashes	\$51.1
High-Risk Sex, Ages 14-20	\$14.0
Youth Property Crime	\$9.3
Youth Injury	\$7.0
Poisonings and Psychoses	\$1.7
FAS Among Mothers Age 15-20	\$3.6
Youth Alcohol Treatment	\$8.8
Total	\$217.6

Youth violence and traffic crashes attributable to alcohol use by underage youth in Rhode Island represent the largest costs for the State. However, a host of other problems contribute substantially to the overall cost. Among teen mothers, fetal alcohol syndrome (FAS) alone costs Rhode Island \$3.6 million.

Young people who begin drinking before age 15 are four times more likely to develop alcohol dependence

and are two and a half times more likely to become abusers of alcohol than those who begin drinking at age 21.² In 2007, 213 youth 12- 20 years old were admitted for alcohol treatment in Rhode Island, accounting for 5% of all treatment admissions for alcohol abuse in the State.³

Alcohol Consumption by Youth in Rhode Island

Underage drinking is widespread in Rhode Island. Approximately 52,000 underage youth in Rhode Island drink each year. In 2007, according to self-reports by Rhode Island students in grades 9-12:⁴

- 70% had at least one drink of alcohol on one or more days during their life.
- 21% had their first drink of alcohol, other than a few sips, before age 13.
- 43% had at least one drink of alcohol on one or more occasion in the past 30 days.
- 23% had five or more drinks of alcohol in a row (i.e., binge drinking) in the past 30 days.
- 5% had at least one drink of alcohol on school property on one or more of the past 30 days.

In 2007, underage drinkers consumed 14.5% of all alcohol sold in Rhode Island, totaling \$107 million in sales. These sales provided profits of \$52 million to the alcohol industry.¹

Harm Associated with Underage Drinking in Rhode Island

Underage drinking in Rhode Island leads to substantial harm due to traffic crashes, violent crime, property crime, unintentional injury, and risky sex.

- During 2007, an estimated 6 traffic fatalities and 400 nonfatal traffic injuries involved an underage drinking driver.
- In 2006, an estimated 2 homicides; 1,900 nonfatal violent crimes such as rape, robbery and assault; and 5,400 property crimes including burglary, larceny, and car theft involved an underage drinking perpetrator.
- In 2006, an estimated 1 alcohol involved fatal burns, drownings, and suicides involved underage drinking.
- In 2006, an estimated 400 teen pregnancies and 2,000 risky sexual acts by teens involved alcohol.
